

Pierre Bonnefille

Carbon Painting 12, 2018

Mixed media, carbon powder on metallic mesh

Height 180cm x width 180cm

Description

The 'Carbon Paintings', created by Pierre Bonnefille in 2017 are the exploration of light in its most silent expression.

Reminding us of the subtle undulations of the water and the calm atmosphere it emanates, the 'Carbon Paintings' evoke the moon's reflection on the nocturnal sea, the vibrations of this white light, especially at night, gives the darkness its mystical quality.

The materials used for these 'Carbon Paintings', matte and shiny, reveal black chimeras and forms which appear and disappear when in contact with the light on the opaque and dark surface, defying the laws of physics.

Through this, the dark becomes the light, Pierre Bonnefille is reversing the rapport, combining the paradoxes of the subtle and insular works.
