SARAH MYERSCOUGH GALLERY
ERNST GAMPERL | AVAILABLE WORK

Ernst Gamperl won the inaugural Loewe Craft Prize (2017) in recognition of his masterful craftsmanship. His work has been acquired by the Victoria and Albert Museum in London, The Loewe Foundation in Madrid, Fonds National d'Art Contemporain in France, Musée des Arts Décoratifs de la Ville de Lausanne in Switzerland, Die Neue Sammlung – The Design Museum in Munich, Collection Issey Miyake in Tokyo, and the Amorepacific Museum of Art in Seoul. Exhibition highlights include his touring solo exhibition Dialogue with Wood, which opened at the Gewerbemuseum Winterthur in Switzerland (2019), followed by a solo presentation at the Korean Craft Museum (2020), and Das Lebensbaumprojekt currently on view at the Bayerisches Nationalmuseum in Munich (2025), and the Museum für Kunst und Gewerbe in Hamburg (2025). Hi solo solo exhibition, Urkraft, opened Sarah Myerscough Gallery's major new gallery space in central Mayfair in October 2025. He has also exhibited at leading international fairs including Design Miami, PAD London, FOG Design+Art in San Francisco, and Masterpiece London.

Ernst Gamperl has revolutionised the practice of woodturning by developing entirely new modes of working that push the material to its technical limits. The artist principally uses the mighty European Oak tree and carefully selects his immense logs from sustainable sources. Ernst turns the Oak when it's green and supple, to work in dialogue with the wood before arriving at a final shape; he is an expert in its drying properties and prophetically reads its movement as the sculpture finds its undulating form. The immanent expressive power of the material is underscored by Ernst's treatment of the surfaces. He waxes, polishes and carves filigree parallel grooves, contrasting smooth and shiny areas with rough-hewn, deeply scarred sections or ruptures of empty space. These enriching elements draw us ever closer to the piece; the profundity of the work lies in Ernst's ability to mine the emotional resonance and durability that already lies within the wood.
